What is GastroAdvisor?

GastroAdvisor is the only platform dedicated to restaurants that will forever change the era of social food. With GastroAdvisor you can discover the best places to enjoy your favorite dishes, book a table online, pay with cryptocurrency, review restaurants, share your experience and earn!

What is GastroAdvisor's mission?

GastroAdvisor wants to help restaurateurs and customers improve their online experience, and help increase the spread of cryptocurrency payments.

How do you solve the problem of outdated information?

By introducing rewards through the FORK token, users of GastroAdvisor.com will be encouraged to add new restaurants and to update already existing data by decentralizing the database update activity, complete and reliable data is always updated in real time.

How do you solve the excess of unrelated search results?

The results provided by GastroAdvisor are not limited to the filters used for the search: through the use of artificial intelligence techniques such as Deep Learning, GastroAdvisor analyzes the reviews, the chronology of the activities, the past searches, the "likes" and follower, to provide the user with those results that best matches their personal profile.

How does the use of cryptocurrencies improve?

GastroAdvisor allows the simple management of payments using the Fork token and other cryptocurrencies like Bitcoin and Ethereum: through the online wallet integrated on the platform, users can view, transfer, and even convert their funds between different currencies, simply and without having to use complicated currency exchange sites.

How do you solve the problem of fake reviews?

GastroAdvisor uses three review levels, called "Bronze", "Silver" and "Gold", which have a different weights for the calculation of the final mark for each restaurant.

How do the "Bronze" level reviews work?

The "Bronze" level reviews can be written by any GastroAdvisor user for each restaurant.

How do the "Silver" reviews work?

The "Silver" level reviews can only be written for those restaurants where the user has actually paid, after having booked through the GA platform. A "Silver" review has a greater weight on the final rating of a restaurant.

How do the "Gold" reviews work?

"Gold" level reviews can only be written for those restaurants where the user has paid with the FORK token. The Gold review is associated with the payment transaction and subsequently a reward will be credited to both, the restaurant that received the payment, and a reward to the user who has booked, paid and reviewed through the GA platform. A "Gold" review has the maximum weight in the calculation of the final rating of a restaurant.

What advantages do restaurateurs have by using GastroAdvisor?

Upon joining GastroAdvisor, restaurants receive a reward in the form of a FORK token. Through the official website they have access to an online platform both, to manage the activity (menus, reservations, promotions, etc ...) and to view, transfer or even convert their cryptocurrencies in a simple way and without having to use other means of exchange.

How is the payment for GastroAdvisor's services?

The reimbursement of services by GastroAdvisor to the restaurateurs is also in FORK tokens, in the form of a commission that is automatically deducted when the customers use the same token.

How to access the whitelist?

Go to www.GastroAdvisor.com, click on "join the whitelist" and a page will be opened where you can click on the whitelist. Fill out the form to access and finally confirm by clicking join. After that you will receive a confirmation email where you will be asked to confirm your registration.

How to participate in the bounty program?

Go to the alpha.bounty0x.io website directly from your browser or from the link on the website www.GastroAdvisor.com, register on the platform (bounty0x) and search for GastroAdvisor, and take part in the bounty you prefer.

How to buy the token?

The token can be purchased by registering on the website www.GastroAdvisor.com. You can use BTC, ETH, Euro or Dollars.
BTC: Payment through a special wallet
ETH: By sending it to the appropriate address of the SmartContract
Euro / Dollars: Credit card or bank transfer

Why buy the token?

Users who will use the platform will have all the advantages brought by the FORK token, from discounts on the services offered by GA, to the possibility of paying their dinner in Cryptocurrency.

Thanks to the token you will also have the possibility to write CERTIFIED reviews through blockchain.

FORK is a token, and as such its value is however given by the market volumes and by the progress of the platform itself. There will also be surprises for the token holder.

The SocialFood

Thanks to the SocialFood GastroAdvisor makes everything simpler. Share a photo of a dish, a recipe, an event, write a quick review and join the community dedicated to food.

Inside the SocialFood users and restaurateurs will be able to share their gastronomic experiences, comment or ask for advice from other users, up to great chefs.
