

## Mission

The mission of GastroAdvisor is primarily to help restaurant owners and users to improve their online experience and to introduce them to accept and allow payments of a consumption through Cryptocurrency.

## BlockChain against fake review

GastroAdvisor creates the first blockchain certified gastronomic review. This function will only be available for restaurants who will accept the FORK token and more digital currencies from GastroAdvisor's users at the counter. Just after the user has made the payment, the transaction hash will automatically be saved by the GA platform through the SmartContract and it will subsequently be notified on the users profile that there is the possibility to write a certified gold review within the next 30 days.
